Session 3
Question 1

In my previous CMPT courses, I learnt ...

A. Insertion Sort
B. Selection Sort
C. Both: Insert and Selection Sorts
D. Another simple sort algorithm
E. No sort algorithm at all
Question 2

What is the time efficiency of this code fragment?

```c
Node *t = NULL;
for ( Node *p = head; p != NULL; ){
    t = p -> next;
    delete p;
    p = t;
}
head = NULL;
```

A. O(1)
B. O(log n)
C. O(n)
D. O(n^2)
E. None of the above
Question 3

In which method could this code fragment be used?

```c
Node *t = NULL;
for ( Node *p = head; p != NULL; ){
    t = p -> next;
    delete p;
    p = t;
}
head = NULL;
```

A. In a constructor of a link-based List ADT class
B. In a destructor of an array-based List ADT class
C. In remove( ) of a link-based List ADT class
D. In removeAll( ) of a link-based List ADT class
E. None of the above
Question 4

Where do we put `#pragma once`?

A. In header files
B. In all of our files
C. We should not use it.
D. In implementation files
E. None of the above
