Weekly Exercise 2

Our challenge:

- In Lab 1 Task 4, it says: “If this program was aimed at end-users, we might design this differently.”
- What does this statement mean?
- Investigate it by modifying your program for this task (i.e., t4.c) with the end-users in mind. “End-users” are the people using your program.
- Call your modified program t4_users.c.
- **Tip:** You may want to have a look at our GPS web page, accessible from the menu on our course web site.
- **Note:** The purpose and requirements of t4.c, as described in Lab 1 Task 4, have not changed: your t4_users.c must satisfy them in addition to satisfying the requirements stated above.
  - The only exception is: **Ignore Requirement 9 of Task 3.**
  - This Weekly Exercise does not change the fact that you are still required to push t4.c, as described in Lab 1 Task 4, onto your Git repo.
Weekly Exercise 2

- Compile and test your program, then ...
- **Submission:**
  - Submit your program on CourSys
- **Due date:**
  - TH Sept. 26 at 4pm (no late submission accepted)
