

CMPT 354 –Database Systems I (Section D100)

Assignment #9

Instructor: Richard Frank (rfrank@sfu.ca)

TA: Ankit Gupta (aga53@sfu.ca)

Total Marks: 50 (5% of the Individual Assignments)

Due Date: Nov 18, 14:30 (via the Online Submission Server)

For all questions, use the AdventureWorksLT database.

Question 1) Using Visual Studio 2010, write a small *website* application that allows the user to select a product category from a list of categories (generated during run-time from the database). Once selected, generate an XML file containing all products within the selected category, along with the product name, price, and all the descriptions associated to that product.
