

CMPT882 Project Proposal

Each individual/group should submit a project proposal to me by October 26. This does not have to be lengthy, but should contain the following information so that both you and I can know that you're on the right track.

- Problem to be addressed
- Techniques to be developed
- Dataset(s) to be used
- Possible issues foreseen
- Approximate timeline for portions of the project to be completed

If you are at all unsure about the project you're considering, or need some ideas for a project to work on, please come and see me.

Please send the proposal to me via email in PDF or plain text format.
