

CMPT888 Project Proposal

Each individual/group should submit a project proposal to me by July 7. This does not have to be lengthy, but should contain the following information so that both you and I can know that you're on the right track.

- Focus of project
 - Your project must involve activity recognition.
- Techniques to be developed
 - If there is a paper you plan to follow, please name it. If there is a set of techniques, please list them.
 - For the major pieces of the work, state what code you plan to implement and what code you plan to use from other sources.
- Dataset(s) to be used
 - e.g. Weizmann action dataset, KTH

If you are unsure about the project you're considering, please come and see me during office hours or after class.

Please submit the proposal via the assignment submission server in PDF or plain text format.
